

New Staff

Dr Greg Williams was appointed as General Manager of the New Zealand Quality College in June. Greg recently worked for SAI Global, first as a senior auditor then as General Manager New Zealand. Prior to that, Greg was Quality Assurance Manager with Nylex New Zealand Limited and Chief Chemist with Nylex Fletcher Limited. He has a BSc, MSc (Hons) and a Ph.D in Chemistry from the University of Auckland and a Bachelor of Business Studies (Accounting and Finance) and a Diploma in Social Sciences (Economics) from Massey University.

Six new accreditation officers have been appointed by IANZ this year. These appointments replace the departures of Rudi Steiner (Inspection Body) and Rochelle Brugh (Medical Testing), and the need to employ additional staff to meet an increasing accreditation work load. New appointments include:

Don Arnold, who has joined the IANZ Chemical/Biology/Dairy programme, has worked for twelve years as a microbiologist for major contract laboratories in New Zealand and the United Kingdom. In addition to laboratory management, Don has also implemented and audited laboratory quality management systems. He was an IANZ Signatory for dairy and non-dairy microbiological testing and has a Bachelor of Applied Science (Food Technology) and a New Zealand Certificate in Science (Biology) from the Auckland Institute of Technology.

Jane Busby is an experienced radiographer who has joined the IANZ Radiology Services programme. Jane graduated with the NZ National Diploma in Medical Diagnostic Imaging in 1996 after studying at Manawatu Polytechnic and gaining clinical experience at Waikato Hospital. Since then, Jane has worked as a locum in NZ, Australia and the United Arab Emirates, and also established Allied Health Professionals Ltd, an employment and recruitment agency.

Alban Castelino, who has a Bachelor of Technology in Engineering, has joined the IANZ Inspection Body programme. He has more than twenty years experience in inspection and quality control covering construction, manufacturing, commissioning and personnel certification in India, United Arab Emirates and New Zealand.

Julie Eccles has joined the IANZ Medical Testing programme from UKAS, the UK accreditation body, where she was an accreditation officer for six years assessing a wide variety of technical disciplines. Julie has a chemistry degree with honours from University of Leeds and was, for five years, senior scientific officer in an analytical chemistry laboratory, where she also became quality manager for the laboratory.

Jed Gibson is a graduate of Auckland University where he gained a BSc in Chemistry. Before joining the IANZ Chemical/Biology/Dairy programme, Jed worked in technical roles in the surface coatings industry.

Robert Glass joined the IANZ Chemical/Biology/Dairy programme earlier this year. He has a BSc (Hons) Environmental Science degree from the University of Plymouth (UK) and a Postgraduate diploma in Environmental Management from the University of Surrey (UK). Robert worked on emission monitoring in the UK and with Watercare Services in Auckland where he was an IANZ Signatory and Key Technical Person.

The administration for the accreditation services has been boosted by a third member. **Diana Poschich** is an experienced business administrator who established the Bay of Plenty branch of New Zealand Couriers before spending 19 years in the chemical industry as office manager. More recently, Diana was customer services manager for a large food importing company, dealing with shipping containers and clearing regulatory requirements with MAF and Auckland Health.
